NeoColab_REC_CS23231_DATA STRUCTURES

REC_DS using C_Week 2_COD_Question 1

Attempt : 1 Total Mark : 10 Marks Obtained : 10

Section 1: Coding

1. Problem Statement

Your task is to create a program to manage a playlist of items. Each item is represented as a character, and you need to implement the following operations on the playlist.

Here are the main functionalities of the program:

Insert Item: The program should allow users to add items to the front and end of the playlist. Items are represented as characters. Display Playlist: The program should display the playlist containing the items that were added.

To implement this program, a doubly linked list data structure should be used, where each node contains an item character.

Input Format

The input consists of a sequence of space-separated characters, representing the items to be inserted into the doubly linked list.

The input is terminated by entering - (hyphen).

Output Format

The first line of output prints "Forward Playlist: " followed by the linked list after inserting the items at the end.

The second line prints "Backward Playlist: " followed by the linked list after inserting the items at the front.

Refer to the sample output for formatting specifications.

Sample Test Case

```
Input: a b c -
Output: Forward Playlist: a b c
Backward Playlist: c b a
Answer
#include <stdio.h>
#include <stdlib.h>
struct Node {
Char item;
  struct Node* next;
  struct Node* prev;
// You are using GCC
struct Node* tail;
void insertAtEnd(struct Node** head, char item) {
  //type your code here
  struct Node* newnode=(struct Node*)malloc(sizeof(struct Node));
  newnode->item=item;
  newnode->next=NULL:
  newnode->prev=NULL;
 if(*head==NULL){
    *head=tail=newnode;
```

```

                                                   24,150,1059
      }else{
        tail->next=newnode;
        newnode->prev=tail;
        tail=newnode;
      }
    }
    void displayForward(struct Node* head) {
      //type your code here
       struct Node* temp=head;
      while(temp!=NULL){
         printf("%c ",temp->item);
         temp=temp->next;
                                                                             241501059
                                                   24,150,1059
      printf("\n");
    void displayBackward(struct Node* tail) {
      //type your code here
      struct Node* temp=tail;
      while(temp!=NULL){
         printf("%c ",temp->item);
         temp=temp->prev;
      }
      printf("\n");
                                                   24,150,1059
    void freePlaylist(struct Node* head) {
    //type your code here
      struct Node* temp=head;
      while(temp!=NULL){
         Node* nextnode=temp->next;
         free(temp);
         temp=nextnode;
      head=NULL;
      tail=NULL;
    }
    int main() {
char item;
                                                                             241501059
                                                   241501059
      struct Node* playlist = NULL;
```

```
scanf(" %c", &item);
if (item == '-') {
